

Did'ja Know?

When we feel love, there is a chemical in our brain that is released called "oxytocin." It helps us connect with others and form tight bonds.

Color That Stuff

Love means getting along with people we don't know very well. Maybe by loving them we will get to know them! Sometimes, it means that we just get along.

Season
After Pentecost

September 4, 2022
13th Sunday
After Pentecost
Luke 14:25-33

GOD'S
LOVE
NEVER
FAILS

Lots of people wanted to follow Jesus. But Jesus had some hard words for them.

"Following me is not easy," he said. "You should know that before you start."

"What do you mean?" someone asked.

Jesus said, "I am asking you to live in a new way. People in your family might be angry about this. You might get in trouble with the law. You will have to leave behind your things."

"So if we really want to follow you," another person said, "we need to know how hard it will really be. Otherwise we'll just give up."

"Yes," Jesus said. "I hope you will still follow me and live in this new way. It will be worth it!"

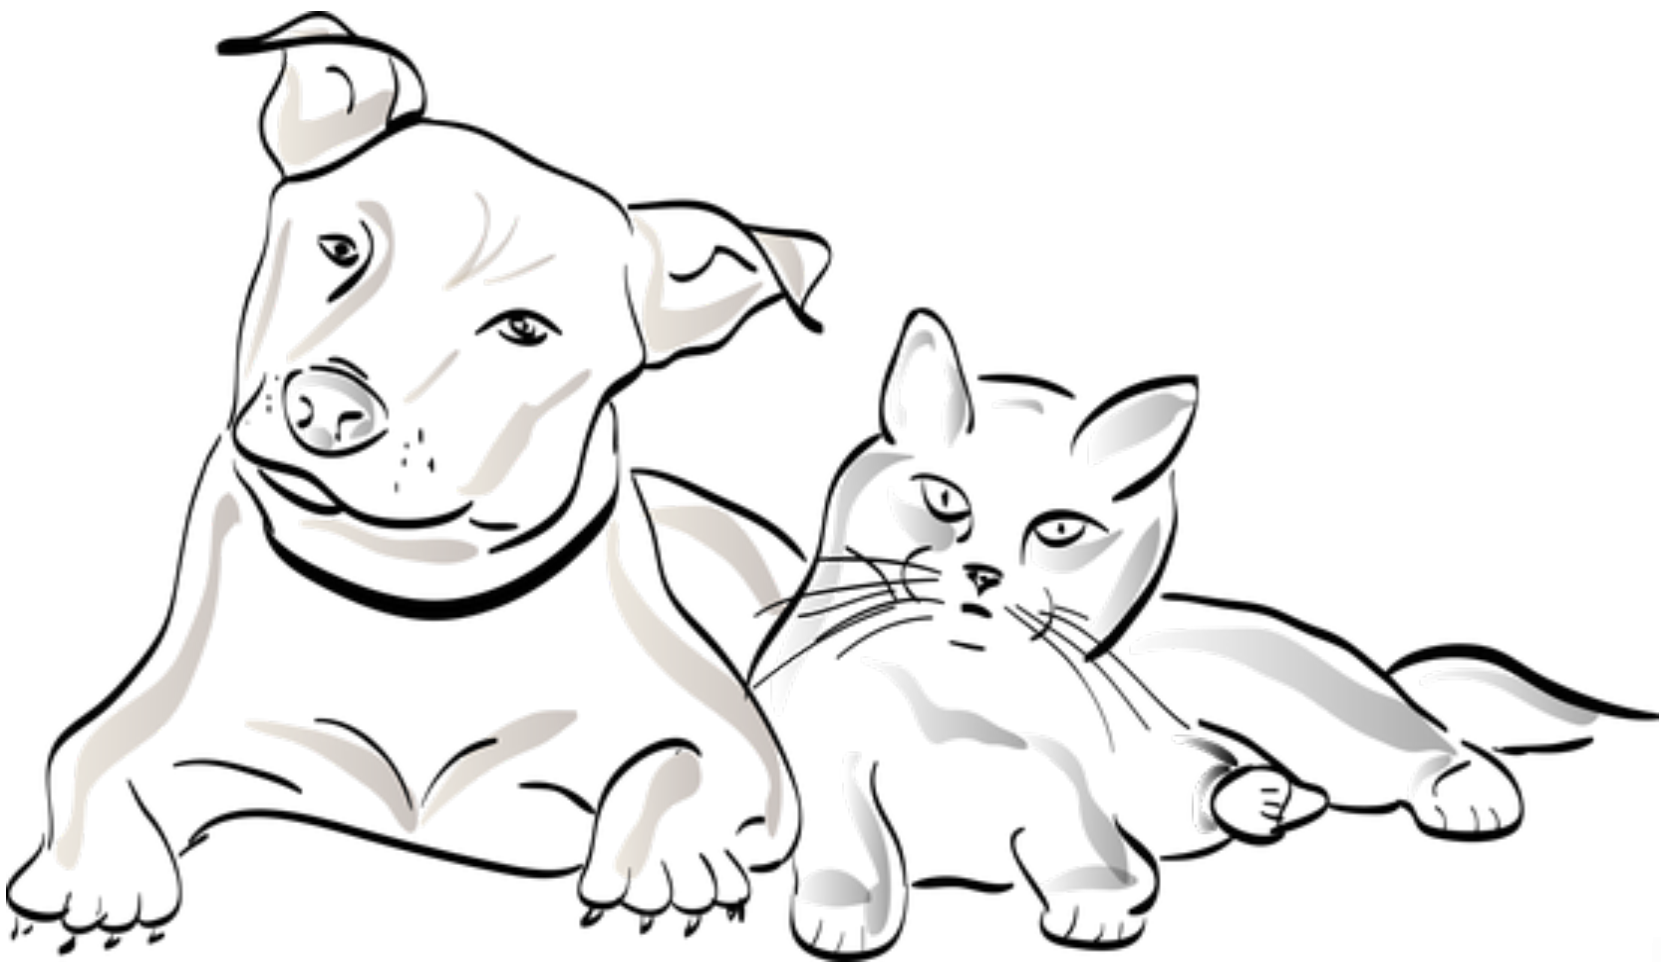

Child of God

God is the perfect parent. God loves you, no matter what. Even when friends and family reject us, God is always there.

PICTURE IT

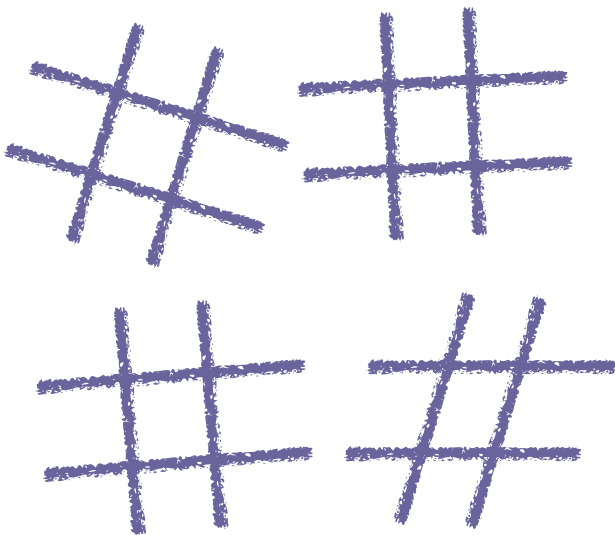

How do we show love to our animal friends? Color the picture and draw in one of your own!

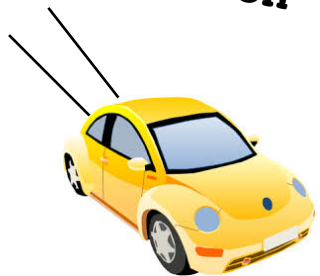

Say: "You're a child of God!" to as many people you can after worship. How did they react?

TICTACTOE

ZOOM ZOOM

On The Road

Next time you're in the car (or on the bus or train) count how many houses you see on a block. All the people who live there are children of God!
